Supervised Estimation

Column → Column Subset → **Human Labeling** → r_{cov}

Unsupervised Estimation

Column → Column Subset, Column Subset, Column Subset, Column Subset, Column Subset → **Pattern Generation on 5 Subsets** (Assumption: $r_{cov}=0.95$) → **Pattern Selection** (for each pattern pool) → **Coverage Calculation** (for each pattern pool) → **Average** → r_{cov}
